

## Hands-on session 4 (Luca Salvatici – Roma Tre University)

### Computable general equilibrium (CGE) models applications

#### Session topics and Readings

You will be introduced to an intuitive, menu-driven CGE model – the RunGTAP model (<https://www.gtap.agecon.purdue.edu/products/rungtap/default.asp>)– which minimizes technological hurdles and allows you to quickly begin to focus on your economic thinking and experimentation.
